2018/2019  
Program***

❖ **September 20<sup>th</sup>, 2018 – Kick off Dinner- at *Sava's* in Ann Arbor**

❖ **Friday 8am-5pm 10/19/2018- Friday All Day- Drs. Only 8 CE *Weber's Inn*  
Sonia Leziy, DDS, Dipl Perio, FCDS(BC), FRCD(C)  
Brahm Miller, DDS, Dipl Pros, FCDS(BC), FRCD(C)**

Dr. Sonia Leziy and Dr. Brahm Miller received their dental degrees from McGill University. Dr. Leziy's post-graduate degree in periodontics was completed at the University of British Columbia, Canada, and Dr. Miller completed his post-graduate prosthodontics certification at the Medical College of Virginia. They are associate clinical professors and sessional lecturers at the University of British Columbia and members of numerous societies and editorial boards. *Dentistry Today* recognizes each of them among the top 100 clinicians in CE in North America, they are recipients of the 2014 Saul Schluger Award. Dr. Leziy is also executive VP of Clinical Affairs for the Seattle Study Club. Drs. Leziy and Miller maintain a full-time private practice in the Imperio Group in Vancouver, Canada.

This presentation will explore how innovations and concept changes shape our skills and treatment planning solutions, while underscoring the importance of collaborative planning between restoring dentist, technician and surgical team members. Surgical concepts that will be reviewed include virtual planning and guided surgery/provisional treatment, immediate implant placement and restoration strategies, and management of bone deficiencies and the gingival biotype.

Prosthetic concepts that will be touched on include post-surgical implant provisionalization, digital scanning, anatomic abutment design and restorative material selection for esthetics and long-term stability, including different scenarios for the hybrid (screw-retained/cemented) crown.

**The following learning objectives will be explored in this presentation:**

1. Soft and hard tissue enhancement procedures used in surgical practice today. Recognize what the surgical team can do, but understand the limitations.
2. Deciding on immediate, early or delayed implant placement and restoration protocols. Recognize the pros and cons of these decisions. The use and fabrication of customized healing abutments and provisionalization: Why they are important steps in guiding tissue form in both anterior and posterior regions.
3. Conventional impressions vs. optical scanning. The pros and cons of both procedures.
4. Review today's restorative material options; understand the strengths and limitations of our product options.
5. Recognize why digital workflows are dramatically improving accuracy and practice efficiency, while reducing errors in the treatment planning phase, surgical protocols and restorative design.

❖ **Thursday 6pm-9pm 11/ 08/2018- Drs. Only 2.5 CE- Weber's Inn**  
**Don Lewis Jr. DDS, CFE- "Be prepared For the Unexpected" Embezzlement**

Donald P. Lewis, Jr., DDS, CFE is a Diplomate of the American Board of Oral and Maxillofacial Surgery and is currently in private practice in Cleveland, Ohio. He received his undergraduate degree from Valparaiso University, his Doctor of Dental Surgery (DDS) from Case Western Reserve University School of Dentistry, and did his post-graduate Residency in Oral and Maxillofacial Surgery at The University Hospitals of Cleveland. He is also a Professor of Oral and Maxillofacial Surgery at Case Western Reserve University School of Dental Medicine.

Dr. Lewis also earned the designation of "Certified Fraud Examiner" (CFE) from the Board of Regents of the Association of Certified Fraud Examiners and is highly sought after and respected lecturer about white-collar crime.

He has presented seminars to healthcare professionals, accountants and legal professionals across the United States and Canada. He has published over fifteen articles dealing with white-collar crime in local, state and national publications and authored two books; Employee *Embezzlement and Fraud in the Dental Office: Scams, Schemes, and Broken Dreams*, and *Your Roadmap to Financial Integrity in the Dental Practice: A Teamwork Approach to Fraud Protection and Security*. These books are written exclusively to address this growing problem in the healthcare profession.

Dr. Lewis is the Chairman and originator of the American Association of Oral and Maxillofacial Surgeons Committee on Software Development and Computer Technology, which has developed a produced **OMSVision®**, the practice management software endorsed by American Association of Oral and Maxillofacial Surgeons (AAOMS).

Due to his voluntary commitment to this project, Dr. Lewis received the first ever *Special Citation Award* in October 2007 for his many years of expertise devoted to the successful launching of the **OMSVision®**.

In his spare time, Dr. Lewis is a high school basketball official, and was selected to officiate The Ohio High School Athletic Association State Tournament Semi-Final game in Columbus, Ohio

❖ **Thursday 6pm- 9pm 12/13/2018- Drs. Only 3 CE –The Sheraton**  
**Dr. Reidy to do presentation on Prosthodontics**

This presentation will describe the edentulous maxilla and mandible. Bony anatomy will be reviewed. Different techniques will be described for the restoration and replacement of the missing dentition. The use of dental implants becomes very important in these oral rehabilitations. The materials and various means of reconstructions will be discussed. Differences in the types of restorations used in each dental arch will be highlighted.

❖ **Friday 8am-1pm 01/04/2018- Drs. & Team members 5 CE-Weber's Inn**

**Todd Williams of Four Seasons on Team Building**

Todd Williams has over three decades of culture development experience in healthcare, hospitality and countless customer-facing industries.

Williams spent over 20 years developing and implementing the training programs for service delivery for Four Seasons Hotels and Resorts, one of the most recognized hotel chains in the world; a brand known for its customized, personalized, intuitive experiences. As Four Seasons' Senior Learning and Development Manager, he was also personally responsible for the culture development and training delivery at each North American Four Seasons opening since 2008. A firm believer in the notion "hospitality" is not an industry, but instead a way of living that puts others first, he's helped teams in multiple industries across the nation improve their customer and associate relations.

In his role with Centura Health as Vice President, Culture Development, Todd focused on employee engagement, building emotional connections, brand differentiation and more, all centered on patient and provider-centric values and a culture of service. Knowing "excellence" is merely baseline in today's competitive environment, he's driven to help healthcare professionals show hospital "guests" what enthusiastic grace, empathetic patience and heartfelt service looks like in action.

Todd has a unique skillset for helping individuals find a passionate connection between their work and personal lives in a way that brings balance and excellence. By helping professionals identify their personal calling, he helps them improve their performance and workplace environment. Teaching others to live purpose-first has become his mission, and he's shown multiple companies and organizations that putting the "soft stuff" first is the answer to driving all levels of success.

❖ **January 23<sup>rd</sup>-26<sup>th</sup> Seattle Study Club Symposium- Amelia Island, Florida**

❖ **Thursday 6pm-9pm 02/07/19- Treatment Planning Drs. Only 2.5 CE- *The Hilton Garden Ann Arbor***

❖ **Friday 8am-1pm 03/15/19 Drs. and Hygienists 5 CE- *The Hilton Garden Ann Arbor-*  
**Dr. Kitrina Cordell- Oral Pathology****

Dr. Kitrina Cordell is Chair of the Department of Diagnostic Sciences and Associate Professor of Oral and Maxillofacial Pathology at the Louisiana State University Health Sciences Center School of Dentistry. Dr. Cordell received her BS in Zoology/Pre-Dentistry from Ohio University followed by her DDS and MS in Oral and Maxillofacial Pathology from The Ohio State University. Prior to joining the faculty at LSU in 2010, Dr. Cordell was as member of the faculty at the University of Michigan School of Dentistry for eight years. At LSU School of Dentistry Dr. Cordell is responsible for educating dental, dental hygiene and advanced education students in clinical and didactic settings; she works in the Faculty Dental Practice diagnosing and treating patients with a wide variety of oral diseases. She actively participates in the LSU Oral Pathology Biopsy Service. Dr. Cordell has published on a variety of topics in the field of oral pathology. She is a member of the ADA, a Fellow of the American Academy of Oral and Maxillofacial Pathology and a Diplomate of the American Board of Oral and Maxillofacial Pathology.

## **"The Top 20 Oral Pathology Lesions"**

This course will provide dental professionals a review of pathologic oral conditions commonly encountered in the dental practice, as well as those less common but clinically significant entities. Numerous clinical images will be provided to give the clinician a thorough review of multiple pathologic processes. The instructor will review appropriate therapy and management suggestions of these lesions.

### Objectives:

At the end of this course participants will be able to:

1. Recognize clinical features of a spectrum of oral lesions including entities from the following categories:
  - a. Infections: Human herpes virus, *Candida albicans*, oral human papillomavirus
  - b. Ulcers and immune-mediated disease: aphthous ulcers, traumatic ulcers, lichen planus
  - c. Soft tissue nodules: 4 "P's" that are "bumps on the gums", denture-related lesions
  - d. Oral dysplasia and squamous cell carcinoma
  - e. Radiographic lesions: Dentigerous cyst, odontogenic keratocyst, ameloblastoma, idiopathic osteosclerosis and cemento-osseous dysplasia
2. Diagnose and be familiar with how to treat a variety of common and/or significant oral lesions
3. Recognize indications for referral

❖ **Friday 8am-12pm 04/12/2019 Drs. only 5CE- Weber's Inn in Ann Arbor**  
**Betsy Bakeman- Occlusion – Diagnosis Driven Management**

Dr. Bakeman is a member of the American Academy of Restorative Dentistry and the American Academy of Esthetic Dentistry and an Accredited Fellow of the American Academy of Cosmetic Dentistry (AACD). Dr. Bakeman serves as an examiner for both the Accreditation and the Fellowship examinations administered by the AACD. She served as Chairman of Accreditation for the AACD and Chairman of the American Board of Cosmetic Dentistry. She is an Adjunct Faculty member of the Kois Center in Seattle, Washington. She has served as Section Editor for *Compendium* and the *Journal of Cosmetic Dentistry* and presently serves on several editorial boards. She maintains a full-time private practice in Grand Rapids, Michigan.

Dr. Bakeman received her D.D.S. degree from the University of Michigan School of Dentistry. She is a member of the American Academy of Restorative Dentistry and the American Academy of Esthetic Dentistry and an Accredited Fellow of the American Academy of Cosmetic Dentistry (AACD). Dr. Bakeman serves as an examiner for both the Accreditation and the Fellowship examinations administered by the AACD. She served as Chairman of Accreditation for the AACD and Chairman of the American Board of Cosmetic Dentistry. She is an Adjunct Faculty member of the Kois Center in Seattle, Washington.

Dr. Bakeman works with dentists and technicians to promote education through publication and served two years as Contributing Editor to the *Journal of Cosmetic Dentistry* and as Section Editor for *Compendium*. She continues to serve on several editorial boards. She publishes and lectures on the topics of comprehensive dentistry and periodontal plastic surgery in the esthetic zone. She maintains a full-time private practice in Grand Rapids, Michigan.

Have you ever wondered why a patient who faithfully wears a night guard still finds their teeth wearing and their restorations chipping? Why do some people have wear on both their anterior and posterior teeth and other people just exhibit wear on their anterior teeth and the posterior teeth remain unchanged? Why some areas of wear flat and other areas involve cupping of the dentin? This course will address these questions and more. By discussing the four functional diagnoses which every dentist should be familiar and the different treatment approaches that are required to assure long term success dentists will become better equipped to incorporate occlusion into their diagnosis and treatment protocols.

- Understand the various functional diagnoses and how they relate to risk and prognosis

- Learn treatment approaches that manage or reduce functional risk and improve long term prognosis

- Recognize the variety of factors that contribute to tooth wear

❖ **May TBD 2019 Final Dinner- Drs. Only**
